Labs - Build a Human-AI Workforce with Autonomous AI Agents

Eight activities: morning personal-assistant practice, then the Kopi Kaki Co. - a fictional Singapore kopi chain launching the Gula Melaka Cold Brew (#ShiokColdBrew) company scenario from Activity 2. The Day 1 office pack is saved under outputs/lab02/; the video team uses outputs/team/; follow each named artifact path.

Copy-ready prompts: open `../prompts/index.html` in your browser (works offline) - pick a lab, click Copy.

Each lab folder contains README.md, LAB-NN-Instructions.pdf (printable), COPY-PROMPTS.txt and data/ (mock company files, skills and brand assets).

Conventions

- Prompts are plain English; terminal commands are marked bash.
- Hermes: start hermes inside ~/kopi-kaki so AGENTS.md is loaded. OpenAI Dots: https://chatgpt.com/dots (verify entitlement).
- Nothing public is ever published without a human APPROVE / Board approval.
- Platforms move fast - if a command differs on your version, check --help and the official docs (Hermes | OpenAI Dots).
