--- name: professional-ppt description: Create an editable six-slide management presentation from approved findings and verified workbook metrics. ---

professional-ppt

1. Read the approved brief, brand guide, analysis.json and analysis-notes.md.
2. Build a decision story: decision, context, revenue chart, customer evidence, options, recommendation.
3. Use editable native shapes and a native chart. Use clear visual hierarchy, readable labels and restrained brand colours.
4. Source every figure to a sheet/table or review ID in notes. Never invent market claims or a human decision.
5. Open or render all six slides, fix clipping/overlap and compare chart totals to the workbook.
6. Save PPTX and reviewed PDF. Record one actual revision and repeat check. Do not send or publish.
