DOCUMENT VERSION CONTROL RECORD

Version Number	Effective Date of Release	Summary of Included Changes	Author
1.0	12 July 2026	Initial release — 3-day lesson plan for the autonomous-AI-agent labs (Hermes Agent, OpenClaw, Paperclip).	Dr. Alfred Ang
1.1	14 July 2026	Revised to a 2-day plan (Day 1: Topics 1 & 2; Day 2: Topic 3 & final assessment). Hermes expanded to 14 labs, OpenClaw to 12, Paperclip to 8 (34 labs total). Learning outcomes aligned to the Course Proposal / TSC; per-lab reference videos added.	Dr. Alfred Ang
1.2	14 July 2026	Visual redesign: all content slides card-format; YouTube links removed from the deck and Learner Guide (videos remain in the labs); live Hermes screenshots and skill-category grids added; Hermes install lab expanded with the official install methods.	Dr. Alfred Ang
1.3	14 July 2026	Deck restyled in the dark masterclass theme end-to-end; added the Hermes masterclass slides (What is Hermes; The Bet: Compounding Value; platform matrix; Top-10 slash commands; Telegram setup; memory L1-vs-L2 and session-search; what-is-a-tool, built-in tool catalog, tools-in-action, cron scheduling, delegation, kanban orchestration and OpenClaw topic slides); Lab 13 rebuilt as the multi-agent video team (profiles + kanban) with detailed Labs 11-14 guides; fade slide transitions and the live Achievements dashboard screenshot.	Dr. Alfred Ang
1.4	15 July 2026	Security masterclass slides added to the Hermes Security lab (defense-in-depth layers; the gateway's six-check default-deny trust chain; channel lockdown dials; the three approval modes + the Tirith scanner; a live Dangerous-Command approval; YOLO mode; the unrecoverable-command blocklist floor; prompt-injection scanning of context files). Security lab steps expanded with the channel allowlist and approvals.mode.	Dr. Alfred Ang
1.5	15 July 2026	Sixteen concept diagrams imported from the original Mastering OpenClaw masterclass deck into Topic 2 (OpenClaw OS control plane; deployment; hub-and-spoke gateway; tools vs skills; SKILL-on-demand; 6-phase execution loop; exec; HEARTBEAT + autonomic tick; workspace file persistence; context assembly; compaction; defense methods; poisoned-skill anatomy; sessions_spawn; sub-agent routing).	Dr. Alfred Ang
1.6	15 July 2026	Topic 3 (Paperclip) rebuilt as the 'Tertiary AI News Research' company across 6 labs (27-32): install on Windows & Mac; company, CEO & mission; model adaptors; a detailed task backlog whose core task hires the team; the Tavily Search API via Secrets; and hiring the members under the hiring task — with live dashboard screenshots. Natural-language prompt steps added to the Hermes and OpenClaw labs alongside the CLI. Platform logos added to the Three Platforms page. 32 labs total.	Dr. Alfred Ang
1.7	15 July 2026	Sixty-eight content slides migrated from the original 'Mastering OpenClaw' masterclass deck into Topic 2 as framed figures in their matching labs — agent evolution and Agent = Model + Harness, the OpenClaw Wikipedia history and OpenAI acquisition, deployment options and services, model stacks and Mission Control, channels, skills and ClawHub risks, tools (AgentMail, Agent Browser, Firecrawl), system prompt / workspace / context and memory, security lockdown, slash commands, crons, and use cases (NFT certificates, dashboard, cost saving, Google integration).	Dr. Alfred Ang
1.8	15 July 2026	Imported masterclass figures re-blended into the dark deck	Dr. Alfred Ang

		theme: original title and copyright strips cropped, white canvases converted to the deck background with text inverted to ivory (embedded screenshots untouched), frameless rendering, and duplicated titles reworded.	
1.9	16 July 2026	Deck curated per trainer review: the bulk masterclass figure imports were removed, keeping nine key figures (Wikipedia history, Agent=Model+Harness, SKILL.md, ClawHub, AgentMail, 10-steps lockdown, HEARTBEAT, autonomic tick, workspace persistence) re-exported at high resolution, with the Topic 2 opening story reordered ahead of Key Concepts. Every CLI step now also shows the natural-language prompt alternative ('Or just ask') across the Hermes and OpenClaw labs, in the deck and Learner Guide.	Dr. Alfred Ang
1.10	16 July 2026	PP assessment updated to v4 — evidence screenshots changed to: Task 1 Hermes interacting on Telegram or the multi-agent Kanban board; Task 2 OpenClaw on Telegram or the TUI; Task 3 the Paperclip setup (company, mission, CEO, hired agents) — with Topic 3 lab references refreshed. A 'RAG vs a Standard LLM Assistant' concept slide added to Core Concepts to ground WA Q2. Final PPT/LP/LG/labs/assessment alignment review.	Dr. Alfred Ang
1.11	16 July 2026	Topic 3 company renamed to 'Altera AI Blogs' with the mission re-pointed at publishing AI-related blogs end to end; the core backlog task is now 'Hire the agents to publish the AI-related blogs end to end' and Lab 32's hiring happens explicitly under it; Lab 29 (Adaptor) and Lab 32 descriptions expanded in full; NEW Lab 33 'Routine & Trigger — Publish Daily at 3pm' (33 labs total), verified with a live 'Run now' pipeline test and two live screenshots.	Dr. Alfred Ang
2.0	18 October 2026	Major revision. Deck redesigned in the 'Agentic AI Applications with Claude Code' house design. Topic 1 rebuilt as Foundations: history of AI, AI agents vs agentic AI, the agentic loop, harness engineering, the brain–perception–action framework, short/long-term memory, world models, single → multi-agent → human–agent collaboration paradigms, agent society, the Oct 2026 agent market (OpenClaw, Hermes Agent, Paperclip, OpenAI Dots, Meta Muse, Block Buzz, Manus Cue and more), Singapore's AgentSea (12,000+ agents) and human–AI use cases in science, maths, drug discovery and business. OpenClaw labs removed; 33 feature labs replaced by 10 connected use-case labs for the fictional Kopi Kaki Co. — Day 1 Hermes Agent (research brief, end-to-end social media campaign, human-in-the-loop publishing, multi-agent video studio, campaign command centre) and Day 2 Paperclip (found the company, hire the team, launch project, weekly video routine, govern & improve) — with mock data, brand assets, skills, instruction PDFs and a local Lab Prompts page. Assessment v5 aligned; FG and AP added.	Dr. Alfred Ang
2.1	29 October 2026	Human–AI landscape rebuilt with practical workflows, research evidence, collaboration modes and humanoid futures; Day 1 single Hermes office automation with gog, Excel, interactive dashboard and professional PPT; Day 2 Kanban and Claude Code video team; SWDA subscription steps and connected GitHub Pages prompts.	Dr. Alfred Ang
2.2	29 October 2026	Streamlined to eight connected activities, four per day, using Hermes Desktop and OpenAI Dots. Removed Paperclip and Claude-specific training. PP v6 evidence: Telegram, single-agent professional PPT with skills/tools, and multi-agent Kanban video creation with Hermes bots. FG/AP v5 aligned.	Dr. Alfred Ang

		Corrected shared use-case slide spacing.	
2.3	29 October 2026	Day 1 reordered: brief AI history, two human–AI work modes, always-on agents, harness and Big Four comparison using BULDRR plus official product documentation. Added Meta Muse Singapore launch news (27 October), official app links and one accessible assistant setup activity. Company scenario moved to afternoon Hermes Desktop/skills labs; Google/Excel, dashboard/PPT, single-agent video and approved test email. Day 2 kept. PP v7: Task 1 two images (chosen assistant and Hermes artifact), Task 2 Activity 4 PPT; FG/AP v6 aligned.	Dr. Alfred Ang
2.4	29 October 2026	Admin slides aligned with the 'Agentic AI Applications with Claude Code' deck: 'Login to LMS and Download Course Material' slide with the current lms-tms.tertiaryinfotech.com sign-in screenshot replaces the outdated LMS slide; Claude Certified Associate (Foundations) badge added to Dr. Alfred Ang's trainer profile. Always-on agents: the four generic 'product inspection' slides replaced by step-by-step 'How to Set Up' walkthroughs for Claude Duet, Meta Muse, Grok Bot and OpenAI Dots from each vendor's official documentation (duplicate route slides merged). AI history timeline: Language era 2017–2023, Action era 2024 onward. Product-development slide rewritten as a worked Kopi Kaki Co. launch example (agent work vs human decision per stage). Whole deck re-sequenced for one continuous narration: Topic 1 runs history → agentic AI → human–AI work and use cases → always-on and the Big Four → Lab 1 setup walkthroughs and checks → Lab 1 → 'Under the hood' (the harness slides merged into one post-lab sequence, 40 min); Topic 2 introduces Kopi Kaki and its data, then Hermes, then places each lab's concept slides directly before that lab (Desktop and skills → Lab 2; Google Workspace and Excel → Lab 3; dashboard, PPT, video and test email → Lab 4) and closes Day 1 with reflection; Day 2 concept slides now precede Labs 6–8 as for Lab 5. Duplicate 'One Agent, Four Office Skills' slide removed. LP sessions and slide ranges re-mapped; LG Topic 1 re-ordered to match, with the product-development example and the four setup walkthroughs added. Timeline circles size to fit their words. QA fixes: Lab 4 now shows its video and approved-email step slides; lab overview cards and topic-divider subtitles no longer overflow; Lab 4 has its own subtitle; Hermes architecture slide links back to the morning harness; LP lab-reference and FG briefing slide ranges corrected; WA Q6 answer cites Activities 5 and 8.
