TGS-2024043854 · DAY 1 · LAB 3 · 45 MIN

Activity 3 — PPT Tool + Skill Build the Kopi Kaki Pitch Deck

Build a Human-AI Workforce with Autonomous AI Agents · One agent + PPT tool and skill · LO2

> On Friday you pitch the bank for a SGD 50,000 loan. Mia turns your brief, reviews and competitors into a professional, editable deck — with a real chart.

The business scenario

You are the founder-CEO of Kopi Kaki Co., a fictional Singapore kopi startup. The Tiong Bahru flagship opens on 1 Dec 2026 with the Gula Melaka Cold Brew (SGD 6.80, #ShiokColdBrew); until then you sell at weekend pop-ups and take app pre-orders. Your team is two baristas — and the AI agents you set up in this course. To open the flagship you need working capital, so you are pitching a bank relationship manager on Friday. You give Mia the campaign brief, the 60 tasting reviews from the pop-ups and the competitor list, plus a PPT tool and a presentation skill. She builds the deck; you check every number and approve it.

You will deliver

- outputs/deck/kopi-kaki-pitch.pptx — 8–10 editable slides with one native chart
- outputs/deck/kopi-kaki-pitch.pdf — rendered copy you reviewed slide by slide
- outputs/deck/qa-report.md — facts checked against the source files, fixes made
- PP Task 2 evidence: ONE screenshot of Hermes Desktop/dashboard showing the PPT run and the deck

Agents: 1 Hermes agent (Mia) with the PPT tool and presentation skill
You (the human): Set the story, check every figure, approve the final deck
Goal: Use a presentation tool and a reviewed skill with one agent to produce a professional, editable deck; verify its facts and design before you accept it (LO2; PP Task 2).

Before you start

- Topic 2 setup and Activity 2 done
- python-pptx in ~/kopi-kaki/.office-venv (from the setup step)
- LibreOffice for the PDF render (`soffice --version`)
- This lab's data/ copied into ~/kopi-kaki

Lab files (data/)

File	What it is
AGENTS.md	Company context Hermes loads automatically

`brand-guide.md`	Brand voice, colours, platform formats
`campaign-brief.md`	Gula Melaka Cold Brew campaign brief (offer, KPIs, timeline)
`compliance-rules.md`	C1–C10 brand-safety and escalation rules
`product-catalogue.csv`	12 products and prices
`competitors.csv`	6 fictional competitors
`customer-reviews.csv`	60 synthetic customer reviews
`assets/brand-palette.png`	Brand image asset
`assets/cold-brew-product-card.png`	Brand image asset
`assets/kopi-kaki-logo.png`	Brand image asset
`skills/kopi-pitch-deck/SKILL.md`	Agent skill (SKILL.md)

All company data in this lab (Kopi Kaki Co., people, reviews, comments, metrics, competitors) is fictional and generated for training.

Steps

1. Copy the deck skill and check the PPT tool (3 min)

The tool writes the file (python-pptx); the skill says how to build a good deck. Hermes also ships a built-in microsoft-office skill (Word, PowerPoint, Excel via python-pptx); the reviewed kopi-pitch-deck skill adds your story, brand and checks.

TERMINAL

```
cp -Rn data/* ~/kopi-kaki/
cat ~/kopi-kaki/skills/kopi-pitch-deck/SKILL.md
mkdir -p ~/.hermes/skills/office && cp -R ~/kopi-kaki/skills/kopi-pitch-deck
~/.hermes/skills/office/
~/kopi-kaki/.office-venv/bin/python -c "import pptx; print('python-pptx', pptx.__version__)"
hermes skills list | grep -i -E 'kopi-pitch-deck|microsoft-office'
soffice --version
```

✓ Expected: kopi-pitch-deck is listed; python-pptx prints its version.

2. Optional: add a hub PPT skill (3 min)

For comparison, Hermes's optional pptx-author skill (adapted from Anthropic's) builds decks headless with python-pptx.

TERMINAL

```
hermes skills install official/finance/pptx-author
```

3. Brief the deck (15 min)

Start a new Desktop chat in ~/kopi-kaki. This is the run you will screenshot for PP Task 2.

PROMPT — PASTE INTO HERMES DESKTOP — MIA, FOLDER ~/KOPI-KAKI

```
Use the kopi-pitch-deck skill and python-pptx (~/kopi-kaki/.office-venv/bin/python). Build the
Kopi Kaki Co. pitch deck for Friday's meeting with a bank relationship manager.
- 8-10 slides: title · the problem · Gula Melaka Cold Brew (SGD 6.80, from 1 Dec 2026) · proof
from the 60 pop-up tasting reviews (average rating and top themes with review IDs) · market and
the 6 competitors · launch plan 17 Nov-14 Dec #ShiokColdBrew · KPIs (2,500 pre-orders, 8%
engagement, 40,000 views) · budget SGD 15,000 · the ask (I will fill in the amount).
- One NATIVE editable chart (ratings distribution or KPI targets), brand colours from brand-
guide.md, the logo on the title slide.
- Speaker notes: the source file for every number.
Save outputs/deck/kopi-kaki-pitch.pptx, render outputs/deck/kopi-kaki-pitch.pdf with soffice,
check every page for clipping or overlap, and write outputs/deck/qa-report.md.
```

✓ Expected: kopi-kaki-pitch.pptx, the PDF and qa-report.md in outputs/deck/.

4. Check it: content errors and layout errors (8 min)

Open the PDF and the PPTX. Content error = a wrong or unsourced number. Layout error = clipped, overlapping or unreadable text. Check three numbers against the source files yourself and click the chart to confirm it is editable.

TERMINAL

```
open ~/kopi-kaki/outputs/deck/kopi-kaki-pitch.pdf
open ~/kopi-kaki/outputs/deck/kopi-kaki-pitch.pptx
cat ~/kopi-kaki/outputs/deck/qa-report.md
```

5. One revision, then approve (8 min)

Ask for a concrete, testable change, then approve the deck.

PROMPT — PASTE INTO HERMES DESKTOP — MIA

```
Revise the deck: (1) make slide 2's headline state the problem in one sentence; (2) on the reviews
slide show the average rating as one big number with the review count; (3) the ask slide: 'SGD
50,000 working capital for the Tiong Bahru flagship'. Re-render the PDF, re-check every page, and
add the changes to qa-report.md. Then summarise what changed.
```

✓ Expected: Updated PPTX, PDF and qa-report.md.

6. Capture your PP Task 2 evidence (3 min)

Take ONE readable screenshot of Hermes Desktop (or the Hermes dashboard) showing your request and the finished deck — for example the chat with the saved .pptx path and the slides open beside it. Hide keys and private data. Keep the .pptx, the PDF and qa-report.md.

Verification / checkpoint

- □ kopi-pitch-deck skill listed; python-pptx works
- □ 8-10 editable slides with one native chart

- □ Three numbers checked by you against the source files
- □ PDF has no clipped or overlapping text; qa-report.md lists fixes
- □ PP Task 2: ONE Hermes Desktop/dashboard screenshot showing the PPT run and the deck

Checkpoint: The .pptx opens and is editable, the chart is a native chart, every number matches the source files, and your PP Task 2 screenshot is saved.

Troubleshooting

Symptom	Fix
`soffice: command not found`	Install LibreOffice (macOS: brew install --cask libreoffice) or open the .pptx and export PDF yourself.
Chart is a picture	Ask Mia to use python-pptx chart_data / add_chart so the chart stays editable.
Invented figures	Point Mia at the source files and the skill rule 'never invent figures'; ask for a sourced revision.

Stretch challenge

Ask Mia to turn the same deck into a one-page investor memo (DOCX) with the microsoft-office skill. Which format would the bank manager read first?
